General

A total of 85 cubic feet of information reports have been boxed and shelved; these reports are the ones published since 1 October 1954. As a result of the boxing and consolidation of the remaining ones, a total of 16 four drawer, metal, key lock, file cabinets were released. The remaining information reports occupy 40 cabinets. The 40 cabinets have been double-decked, thereby leaving enough floor space to erect 18 more sections of 30 inch shelving. The sections are now in the process of being assembled and when this is done, the Center will have space available to store additional halftones and map negatives.
